COMPARISON TO PREVIOUS ISSUE

Issue EDSL08 of 29 May 2008:

- SG13 - NAD : add Part qualifier MF Manufacturer of Goods, to identify the recipient of returns
- Increase the occurrence to R..6
- SG14 – QTY – add Quantity qualifiers: 61 Return qty, 64 Scrap Qty, 162 Functional sample quantity

Issue EDSL07 of 31 May 2006:

- Addition of Ship-to Address specification and related UN/EDIFACT code

- Change SG13-NAD from R1 to R..5
- Add the UN/EDIFACT qualifier "ST = Ship-To Customer" to 3035 Party Qualifier

- Upgrade to UN/EDIFACT Code list D.04B

EDIFICE code changes applied to the MIG. These EDIFICE codes will be submitted to UN/CEFACT for inclusion in the UN/EDIFACT standard.

SG14 - LIN - DE 1229

'30' Resale & Claim replaced with '113' Resale & Claim

'31' Resale only replaced with '114' Resale only

Correction of the examples according to the code changes.

12 May 2004 : EDIFIX 5.0 Technical Upgrade

- The 'KMT' qualifier in SEG QTY and PRI DE 6411 is now defined as (*) EDIFICE code. UN/ECE Recommendation 20 specifies 'KTM' as qualifier for 'kilometre'.

Issue EDSL05 of 03 November: The change applied does not affect the functionality of the message.

- UNH segment, DE 0057 Association assigned code was changed from EDSR04 to EDSL05 conform the rules described in the EDIFICE Utilisation of the UN/EDIFACT Service Segments EDSS04.

21 May 2003 :

- EDIFICE Utilisation for SG14 CUX DE 6347; SG14 MOA DE 5025; SG15 RFF C506: changed from 'R' to 'M' according to UN/EDIFACT specifications – this does not affect the functionality of the message.

- EDIFIX 4.2 Technical upgrade; review and correction of examples

Issue EDSR04 of 13 November 2002 is based on UN/EDIFACT D97.A / Code List D01.A

- Addition of the following code values:
 - o SG14, LIN segment, CO C212, DE 7143 code 'SRV' EAN.UCC Global Trade Item Number
 - o SG14, PIA segment, CO C212, DE 7143 code 'SRV' EAN.UCC Global Trade Item Number
 - o SG15, RFF segment, CO C506, DE 1153 code 'DW' Design Win

'IV' Invoice number

Issue EDSR03 of 29 May 2002 – addition of recommended set of DTM qualifiers

Issue EDSR03 : Changes compared to Issue EDSR02 of the Sales Report Message endorsed 18 November 1998

- SG14 - PRI In order to provide for the Automated price protection cycles - SAP/DRM requirement
- Add qualifiers 'CON' = Contract Price and 'DIS' = Distributor price in DE 5387 Price type qualifier with usage = O

Changes compared to Issue EDSR01 of the Sales Report Message endorsed on 4 March 1998:

- SG15 - RFF occurrence has been changed from M..6 to M1 conform the UN/EDIFACT message design rules.

SLSRPT issue EDSR01 compared to the EDIFICE Resale Report document, Issue 1, endorsed on 29 November 1991

- New message structure/looping to support efficient processing by the removal of redundant NAD data (through the introduction of a DOC segment),

- Provision to support the reporting of discrete resale data only or the reporting of combined resale & claim data,
- Provision to support an intermediate end customer,
- Provision to support visibility of financial adjustments,
- Provision to support visibility of A to B transfers,
- Recast from the 90.1 version of the UN/EDIFACT directory to the D.97A version,
- Where UN/ECE Recommendations are referenced the most commonly used codes have been identified,
- Alignment of segments and composite data elements to ensure conformance (data harmonization) across all EDIFICE Implementation Guidelines,
- Update of the REFERENCES and EXPLANATORY NOTES sections to comply with the EDIFICE Standards for Documentation of Message Implementation Guidelines, Issue 3,
- Update of examples,
- Documentation adjustments resulting from the use of GEFEG's EdiFix Message Implementation Guidelines documentation tool,
- Correction of typographical errors.

EDIFICE FUNCTIONAL DEFINITION

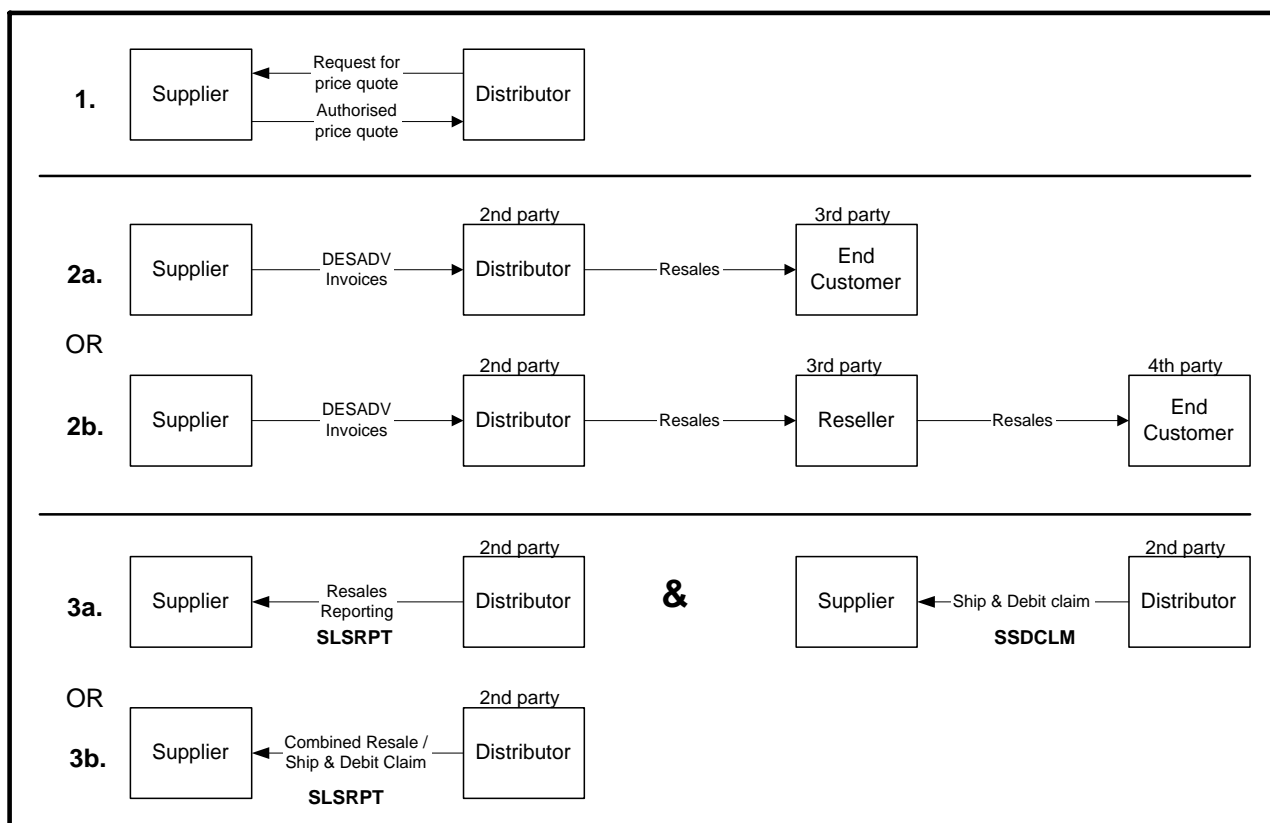

Compliance with UN/EDIFACT SLSRPT

The header section of the EDIFICE SLSRPT message is fully compliant with the corresponding section of the UN/EDIFACT SLSRPT message.

The detail section, SG13 however, must be seen as a third option, mutually exclusive with the present SG5 and SG9 functionality. EDIFICE will raise a DMR in order to have its specific requirements included in a future issue of the UN/EDIFACT SLSRPT message.

The SLSRPT message is designed to facilitate the provision of information between a manufacturer's agent (commonly referred to as a distributor) and the manufacturer (commonly referred to as a supplier) to identify those of the supplier's products (and supporting related data) which have been sold onto or credited to a third/fourth party end customer during specified time periods.

The diagrams below detail the business flow common to the supplier/distributor environment within the Electronic Components Industry:

The SLSRPT message supports Points **3a.** and **3b.** of the business flow above and is designed to transport information related to uniquely identified products. This information comprises but is not limited to:

- Product information,
- Activity periods,
- Resale, pricing and monetary information,
- Seller, buyer and end customer information.

The following details common business practices adopted within the supplier/distributor environment. They can all be captured and supported by the SLSRPT message:

"End Customer"

Visibility of the sales chain is typically restricted to the third party end customer; however there may be instances where name and address related data only is required of the fourth party end customer.

"Ship & Debit"

The distributor will hold inventory of the supplier's products (purchased by the distributor at a fixed price). Where the distributor's "planned" margin (profit on the Resale) is not achieved, the supplier may give a dispensation to the distributor for that price and support the distributor's margin via a pre-approved price quote (at time of invoicing by the distributor to the end customer).

In these situations the distributor may then subsequently claim for the price delta between the supplier's invoiced price (fixed) and the supplier's previously authorised price quote.

The SLSRPT message may be used to support the above described "Ship & Debit" claim process BUT only where the claim is combined with the resale activity. This is managed by the provision of additional related data. The utilisation of the combined SLSRPT (resale & claim) message or the discrete SLSRPT (resale only) message and SSDCLM (claim only) message is mutually agreed between trading partners.

"A to B Transfers"

When a supplier is unable to fulfil a distributor's purchase order request (for immediate shipment) but another franchised distributor of that same supplier has free stock of the required product available on his shelf, an A to B transfer will be affected. The resulting data within the SLSRPT message will be used by the supplier to track intra-distributor and inter-distributor product movement and to make appropriate in-house adjustments.

Intra: ("Far & Wide" [distributor] in the UK sells onto "Far & Wide" [distributor] in Germany.

Inter: ("Far & Wide" [distributor] in the UK sells onto "Dream On" [distributor] in Italy.

"Financial Adjustments"

There are instances where the distributor may debit or credit his end customer with no physical shipment or return of product involved. In these situations the distributor is required to report monetary values as opposed to unit quantities.

BRANCHING DIAGRAM

SEGMENT GROUPS/SEGMENTS DESCRIPTION

UNH MESSAGE HEADER

Function: A service segment heading, and uniquely identifying the message.
Usage: M1

BGM BEGINNING OF MESSAGE

Function: A segment uniquely identifying the message by means of its coded name, number and function.
Usage: M1

DTM DATE/TIME/PERIOD

Function: A segment specifying the date/time of creation of the message, and other dates relevant to the whole message.
Usage: M..3

SG1 NAD

Function: A group of segments identifying the parties involved.
Usage: M..3
Notes: The NAD segments identifying the buyer and seller must be present.

NAD NAME AND ADDRESS

Function: A segment identifying the function and coded identification, name and address of a party involved.
Usage: M1

SG4 CUX

Function: A group of segments specifying the currencies, valid for the whole report.
Usage: D..2
Notes: One CUX segment specifying the invoicing currency should be present either at header level or detail level. If given at detail level, it must not appear here.

CUX CURRENCIES

Function: A segment specifying a currency for all prices and amounts.
Usage: M1

SG13 DOC-NAD-SG14

Function: A group of segments providing transaction details of the documents within the message. Transactions can be a result of movement of goods or financial adjustments.
Usage: R..99999

Notes: The following matrix defines how the four different business scenarios should be accommodated within the SLSRPT message:

	DOC	QTY	PRI	MOA
	-----	-----	-----	-----
Debit; financial adjustment only (Distributor bills ultimate or intermediate customer; no physical product movement)	'80'	N	N	R
Credit; financial adjustment only (Distributor credits ultimate or intermediate customer; no physical product movement)	'381'	N	N	R
Invoice (Distributor bills ultimate or intermediate customer; physical product movement)	'380'	R	R	N
Credit (Distributor credits ultimate or intermediate customer; physical product movement)	'381'	R	R	N

DOC DOCUMENT/MESSAGE DETAILS

Function: A segment specifying a document relative to the transaction.
Usage: M1

NAD NAME AND ADDRESS

Function: A segment identifying the third party with whom the transaction was made.
Usage: R..6

SG14 LIN-PIA-QTY-CUX-PRI-MOA-SG15

Function: A group of segments providing details of the individual line items of the specified document.
Usage: R..99999
Notes: The PRI and QTY segments must be specified when the transaction refers to a physical movement of goods.
The MOA segment will only occur when the transaction is a financial adjustment.
The use of segments QTY, PRI and MOA is as specified in the matrix in the notes of SG13.
One CUX segment specifying the invoicing currency should be present either at header level or detail level.
If given at header level, it must not appear here.

LIN LINE ITEM

Function: A segment identifying a line item by its item number, and agreed to be the primary reference number between the buyer and seller.
The segment also carries a sequence number assigned to the line item within the message.
Usage: M1

PIA ADDITIONAL PRODUCT ID

Function: A segment providing additional identification numbers for the line item.
Usage: O..6

QTY QUANTITY

Function: A segment specifying the quantity for the line item.
Usage: D1

CUX CURRENCIES

Function: A segment specifying the currency of the specified document.
Usage: D..2

PRI PRICE DETAILS

Function: A segment specifying the line item price and qualifying information.
Usage: D..3

MOA MONETARY AMOUNT

Function: A segment specifying the monetary amount related to the line item.
Usage: D 1

SG15 RFF-DTM-SG16

Function: A group of segments specifying references for the line item.
Usage: R..99999
Notes: SG16 is only used to specify the ultimate party if different from the third party.

RFF REFERENCE

Function: A segment specifying a document reference number.
Usage: M1

DTM DATE/TIME/PERIOD

Function: A segment specifying the date/time of the reference document.
Usage: O 1

SG16 NAD

Function: A group of segments identifying the ultimate parties related to the transaction.
Usage: D 1
Notes:

NAD NAME AND ADDRESS

Function: A segment identifying the function and coded identification, name and address of the ultimate party involved.
Usage: M1

UNT MESSAGE TRAILER

Function: A service segment ending, and providing information for checking the completeness of a message.
Usage: M1

SEGMENT DETAILS

UNH

UNH MESSAGE HEADER

Function: A service segment heading, and uniquely identifying the message.

Usage : M1

Notes : Refer to EDIFICE Utilisation of the UN/EDIFACT Service Segments, Issue EDSS04

SG13 DOC-NAD-SG14

NAD NAME AND ADDRESS

Function: A segment identifying the third party with whom the transaction was made.

Usage : R..6

Notes : The third party is usually the ultimate customer but in some cases, this party specifies an intermediate party. In this case DE 3035 = 'IK' and SG16 containing the ultimate party identification must be present. It is advised that the party identification CO C082 be used. When CO C082 cannot be used it is recommended to use the structured name and address CO C080 through DE 3207 rather than the unstructured one CO C058.

Ref.	Rep.	Name	EDIFICE Utilisation

SG14 LIN-PIA-QTY-CUX-PRI-MOA-SG15

PRI PRICE DETAILS

Function: A segment specifying the line item price and qualifying information.

Usage : D..3

Notes : Catalogue price and new buy price are specified with the order currency. Resale price is specified with the invoicing currency.

Ref.	Rep.	Name	EDIFICE Utilisation	
C509		C PRICE INFORMATION	R	
5125	an..3	M Price qualifier	M	AAA = Calculation net
5118	n..15	C Price	R	
5375	an..3	C Price type, coded	R	CA = Catalogue Stocking price used between the buyer and seller. NBP = New buy price (*) Re-negotiated buy price between the buyer and the seller. RES = Resale price (*) Price used between the buyer and the end-customer in either an invoice or credit situation. (*) EDIFICE code
5387	an..3	C Price type qualifier	O	CON = Contract price Basis contract cost DIS = Distributor price Distributor non-contract
5284	n..9	C Unit price basis	R	
6411	an..3	C Measure unit qualifier	R	Use the following codes from UN/ECE Recommendation no.20, Codes for Units of Measurement: CLT = centilitre CMT = centimetre GRM = gram KGM = kilogram KMT = kilometre (*) LTR = litre MGM = milligram MMT = millimetre MTK = square metre MTQ = cubic metre MTR = metre PCE = piece (*) (*) EDIFICE code, not included in UN/ECE Recommendation No. 20 Other codes should be previously agreed between trading partners.
5213	an..3	C SUB-LINE PRICE CHANGE, CODED	N	

SG14 LIN-PIA-QTY-CUX-PRI-MOA-SG15**MOA MONETARY AMOUNT**

Function: A segment specifying the monetary amount related to the line item.

Usage : D 1

Notes :

Ref.	Rep.	Name	EDIFICE Utilisation	
C516		M MONETARY AMOUNT	M	
5025	an..3	M Monetary amount type qualifier	M	244 = Price adjustment amount
