#### COMPARISON TO PREVIOUS ISSUE

-----

No previous issue of this message exists.

#### EDIFICE FUNCTIONAL DEFINITION

-----

The Blanket Order is part of a business cycle which includes forecast, and call-off activities. It will normally be used where trading partners have a stable trading environment, and multiple deliveries of stable product requirements exist. The Blanket Order will order goods over an extended time period but where requirements such as schedules and locations for delivery are not known. This information should be transmitted using Forecast/Call-Off (DELFOR) or JIT-Delivery (DELJIT) Messages, or by non-EDI means or by a combination of these.

+---+		+---+
!	ORDERS - Blanket Implementation (send once)	!
! B !	----->	! S !
! U !		! E !
! Y !	DELFOR - Forecast (send e.g. monthly)	! L !
! E !	----->	! L !
! R !		! E !
!	DELJIT - JIT Call-off (send e.g. daily)	! R !
!	----->	!
+---+		+---+

It should be noted that that the Blanket Order is a specific implementation of the EDIFACT ORDERS message.

The Blanket Order establishes the procurement relationship between the trading partners, allowing them to implement the forecast and call-off activity and to carry out payment cycle activities by providing the order number.

Trading partners must agree the point of commitment to purchase specific quantities of products prior to using a Blanket Order. The point of commitment may be at the Blanket Order stage, or it may be later in the business cycle, for example a defined number of weeks prior to delivery, which would be communicated in the Forecast/Call-Off (DELFOR) message.

The Blanket Order can be used in three different ways:

1. For ordering parts for delivery over a defined extended period of time (e.g. 1 year). The Blanket Order ceases to be effective at the end of the time period. The Blanket Order must at least contain statements of the description and time period of the order. Where possible the price should be contained within the message.
2. For ordering a defined quantity of product for delivery over an undefined extended time period (e.g. 100,000 pieces estimated as 2 years requirement). The Blanket Order ceases to be effective when the 100,000 pieces are delivered. The Blanket Order must at least contain statements of the description and the quantity of goods to be ordered. Where possible the price should be contained within the message.

3. For ordering a defined quantity of product for delivery over a defined time period (e.g. 100,000 pieces within 1 year). The defined quantity must be delivered within the time period. The Blanket Order contains the information required in both Use 1 and Use 2 above.

The Blanket Order may contain one or multiple line items.

The EDIFICE guideline for the utilisation of the EDIFACT ORDERS message assumes that a business agreement exists, which defines all standard, basic trading terms and conditions as agreed between the two parties. As such a Blanket Order always constitutes a business transaction under this agreement, to which it will refer for basic terms and conditions.

The following additional principles apply:

- All Blanket Orders should have a unique document number assigned by the buyer and this must be sent in the BGM segment.
- The buyer's and seller's identification must always be present in the message, and this information must be sent in the NAD segment.
- It has been assumed that trading partners using Blanket Orders will have part numbers to identify the item ordered. When no part number exists one should be created for the purposes of EDI.
- Data at detail level will not override data at header level.

EXPLANATORY NOTES

-----

The following abbreviations are used within this document:

DE = Data Element  
SG = Segment Group

The following terms and codes are used to indicate, in a more detailed and precise way than EDIFACT, the usage of the data concerned in the EDIFICE Guidelines:

EDIFACT	EDIFICE
-----	-----
M (Mandatory)	M (Mandatory)
C (Conditional)	R (Required)
C (Conditional)	D (Depending)
C (Conditional)	A (Advised)
C (Conditional)	O (Optional)
C (Conditional)	X (Not used)

Mandatory = EDIFACT dictates that the Data Element or Segment must be present.

Required = EDIFICE members agree that the data concerned must be sent.

Depending = The data concerned must be sent if a particular defined condition or set of conditions exists. The associated conditions must be explained at the appropriate level of detail.

Advised = Indicates that the RECEIVER of the message would prefer the data concerned to be sent, but does not require its transmission.

Optional = Indicates that the transmission of the data concerned is at the need or discretion of the SENDER, i.e. it is not required by the receiver in order to perform its business function. EDIFICE requires that the use of 'O' must be agreed between trading partners.

Not Used = The Data Element or Segment will not be used by EDIFICE members.

Where a Composite Data Element is indicated as Not Used, the column 'usage status' for the Component Data Elements will remain blank.

The number of occurrences shown in the message diagram indicates the required or maximum number of occurrences for the EDIFICE utilisation. The EDIFICE usage status and number of occurrences for segments or segment groups will be represented analogue to the representation of data elements.

e.g.: R3 The segment or group is required 3 times (fixed number)  
R..3 The segment or group is required up to 3 times  
(maximum number)

The following table indicates the number of integer and decimal digits to be used for numeric data elements when needed:

Numeric Class	Repr: Digits	Integer Digits	Decimals
Dimensions	n..18	15	3
Quantities	n..15	12	3
Volumes	n..18	15	3
Weights	n..18	15	3
Unit Prices	n..15	11	4
Amounts	n..18	15	3
Currency Rates	n..12	6	6
Percentages	n..8	3	5

EDIFICE recommends that where there are significant decimals, these are explicitly stated using a decimal mark in a character position. Similarly the minus sign should be used to explicitly state a negative value.

All date fields can be described in the format YYMMDD or CCYYMMDD. Consistent use of one date format should be adhered to throughout the entire document.

SEGMENT GROUP 1  
-----

Function: To indicate reference documents relating to the whole Blanket Order.  
Usage : D..2  
Remarks : Reference (RFF) segments specifying contract information or quote information should be present in the message. Where the information refers to the whole Blanket Order it must be in Segment Group 1. Where the information is different for various Line Items (LIN) it must appear in every Segment Group 28, and not here.

--- Segment Group 1 ----- D..2 -----+  
RFF Reference M1 -----+

## RFF REFERENCE

-----

Function: To specify contract or quote references.

Usage : M1

Remarks : This RFF segment is used where contract and quote information  
applies to the whole message. Where this is not the case then  
this information must be in the Segment Group 28 RFF segment.

PIA ADDITIONAL PRODUCT ID

Function: To specify additional item identification.

Usage : D..12

Remarks : Additional information that needs to be attached to the product such as an engineering change level can also be included in this segment.

Note 1: DE 7143 ITEM NUMBER TYPE, CODED

- 'BP' Buyer's part number
- 'VP' Vendor's (seller's) part number
- 'EN' International Article Numbering Association (EAN)
- 'EC' Engineering change level
- 'RN' Release number
- Use this code until EDIFACT makes a code available
- 'GS' General specification number
- 'VX' Vendor specification number
- 'DW' Drawing
- 'DR' Drawing revision number
- 'CCM' COCOM list number
- Use this code until EDIFACT makes a code available

Note 2: DE 3055 CODE LIST RESPONSIBLE AGENCY, CODED

- '9' EAN (International Article Numbering association)
- '91' Assigned by seller or seller's agent
- '92' Assigned by buyer or buyer's agent

EDIFICE requires that code '91' is used to indicate information related to the Seller's part number ('VP') and code '92' is used to indicate information related to the Buyer's part number ('BP'). Code '9' is used to indicate information related to the EAN number ('EN').

SG25

DETAIL

SEGMENT GROUP 28  
-----

Function: To indicate references associated with the line item.

Usage : R..4

Remarks : This segment should be used at least once to give a unique  
reference to the Line Item

--- Segment Group 28 ----- R..4 -----+  
RFF Reference M1 -----+

## RFF REFERENCE

-----

Function: To specify line item references.

Usage : M1

Remarks : The individual items being ordered must be identified by means of an RFF segment with a reference qualifier DE 1153 'LI' with DE 1154 not used. Where the RFF at header level could not be used to specify contract and quote information it should appear here. Where the header level RFF gives the contract and quote information it must not appear here. The job number should only be used with sub-contractors.

Ref.	Rep.	Name	! EDIFICE UTILISATION
-----+-----			
			! !
C506		M REFERENCE	!M!
1153	an..3	M Reference qualifier	!M! See Note 1
1154	an..35	C Reference number	!D! As specified by DE 1153
1156	an..6	C Line number	!D! See Note 2
4000	an..35	C Reference version number	!X!
			! !
-----+-----			

Note 1: DE 1153 REFERENCE QUALIFIER

- 'CT' Contract number
- Reference number of the contract between two parties
- 'PR' Price quote number
- 'AAD' Contract addendum number
- Number assigned by the issuer to a contract addendum
- 'JB' Job number
- 'LI' Line item reference number
- Buyer's original line number

Note 2: DE 1156 LINE NUMBER

Within an order this must be a unique number which will be the key for the identification of the line item. The number is assigned by the buyer, and can only be assigned once during the lifetime of the order. This DE must be used when the DE 1153 Reference qualifier = 'LI'.

SG25

DETAIL

SEGMENT GROUP 29

-----

Function: To identify the item packaging.

Usage : D1

Remarks : This segment group should only be used when the Blanket Order will not be followed by a DELFOR message. Where a DELFOR message will be used item packaging information must appear there. This segment group will also only be used where alternative packaging methods are agreed between the trading partners.

--- Segment Group 29 ----- D1 -----+  
PAC Package M1 -----+

## PAC PACKAGE

-----
