## **EDIFICE FUNCTIONAL DEFINITION**

### Business flow diagram

### Principles

The INVRPT StoD message is designed to facilitate the provision of information between a manufacturer (commonly referred to as a supplier) and a manufacturer's agent (commonly referred to as a distributor) on the status of the supplier's product lead time and/or availability.

The INVRPT StoD message supports Point 2. of the business flow above and is designed to transport information related to uniquely identified products. This information comprises but is not limited to:

- Product information,
- Seller and buyer information,
- Lead time information,
- Date horizon information,
- Availability information.

Usually, the INVRPT StoD message contains the same products as the distribution PRICAT message, so when, for example quarterly, the content of the PRICAT message changes (new products added and old products withdrawn), also the content of the full INVRPT StoD message will be different, hence the full refresh, which can be either scheduled or sent on request.

The INVRPT StoD message can be used to send variances or updates, for example on a daily basis.

To accommodate the above two scenarios, both 'change' and 'original' message types are catered for by the use of DE 1225 in the BGM segment.

Function: A segment specifying a quantity.

Usage : M1

Notes : Where a lead time applies to a quantity range specify the maximum quantity in DE 6060 and use code 'LTQ' in DE 6063.

Where a lead time does not apply to a specific quantity enter zero in DE 6060 and code 'LTQ' in DE 6063.

Where the product is considered to be on allocation use code 'LTQ' in DE 6063 and enter zero in DE 6060. The data elements within the DTM segment should contain the following values: '169' in DE 2005, '99' in DE 2380 and '803' in DE 2379.

Where no lead time can be given use code 'LTQ' in DE 6063 and enter zero in DE 6060. Within the DTM segment use code 'ASK' in DE 2005. DE 2380 and DE 2379 are not used.

When codes '17' or '143' are used in DE 6063, the DTM segment in this segment group does not need to be sent as the inventory report date (code '366' in DE 2005) specified in the header DTM segment applies.
